I am a web developer skilled in both frontend and backend development, specializing in the React, Typescrpit, Nodejs and Mongodb. utilizing tools like Git for version control, Webpack/Vite for bundling, and Postman for API testing. With strong abilities in debugging, problem-solving, and database management, proficient in time management, collaboration, and critical thinking, ensuring the delivery of high-quality solutions.

CAREER: 3+ YEARS OF EXPERIENCE

Codygo solutions   01/2024 - Present
Full-Stack Developer

Consistently delivered high-quality results under tight deadlines while managing multiple systems. My work involved utilizing **React, TypeScript, Node.js, Firebase and Mongodb**

- Managed working on **three distinct systems** concurrently, mostly using React TypeScript and Node.js, demonstrating strong **multitasking skills**.
- Excelled under pressure, consistently delivering high-quality results within **tight deadlines.**
- Integrated iframes into external sites, ensuring functionality and efficiency, with added configurations for compatibility with any website in both **appearance and performance.**
- Collaborated effectively with developers from diverse backgrounds and locations, **fostering clear communication and synergy in English.**

Fiverr Freelancer   04/2021 - 12/2023
Full-Stack Developer

Designed and developed projects utilizing frameworks like **React,** alongside **TypeScript, Node.js, MongoDB, and MySQL**, producing scalable and maintainable web solutions while adhering to best practices and industry standards.

- Established a **strong reputation** as a reliable and skilled web developer, **earning 100% positive reviews** from satisfied clients with attention to detail and high-quality work.
- **Optimized** application performance by improving backend API endpoints and enhancing frontend data handling strategies, implementing caching techniques that resulted in reduced response times and improved data retrieval efficiency, which enhanced overall user satisfaction.
- **Solely crafted** the frontend structure and design, integrating best practices and appropriate technologies to ensure smooth functionality, responsive designs, and scalability. Successfully managed **multiple projects simultaneously**, ensuring timely delivery and client satisfaction, with a **100% on-time delivery rate** and client satisfaction.

TECHNICAL PROFICIENCIES

Programming Languages: JavaScript | TypeScript

Client: React.js | React Query | HTML5 | CSS3 | Sass | Material UI | Chakra UI | Redux

Server: Node.js | Express.js | MongoDb | Mongoose | Firebase | Redis

General Knowledge and tools: Sockets | Storybook | Git | GitHub | Vite | Figma

EXTRA

- 10 Units Computer science
- Award for outstanding performance as a senior medic from the Medical Commander of the Northern Command.
